Sec. 14-137. Restoring Right-of Way to former condition

It shall be the duty of the public works administrator to keep on file all copies of permits issued hereunder and to inspect from time to time all pavements or right of way surfacing, disturbed pursuant to such permits. If such pavements or surfacing are not restored at or above the original condition, notice thereof in writing by regular mail shall be given the permittee, who shall put the same in good condition within a maximum of three (3) days. If the permittee fails after notice given to restore and maintain such pavement or the surfacing thereof, the city engineer may make the necessary repairs and such permittee shall pay the cost thereof, and until he pays the same no other permit shall be issued to him or any person in his behalf. Consult the city engineer for typical trench patching requirements.

(Ord. No 1044, 1-25-2007)

Sec. 14-140 Trench Compaction

The city will not allow the water soaking of trenches resulting from utility replacement or repairs. All trenches will be mechanically tamped and compaction will meet the requirements of the city, which are ninety five (95) percent or more compaction. Anyone violating this section will be fined a maximum of one hundred dollars (\$100.00) per day.

(Ord. No 1044, 1-25-2007)

*** A map or drawing of each excavation may be requested.**
